

The *Bilbao* planter is a pyramidal element with a triangular base and slightly arched sides. The formal result is achieved by means of a torque of 16 degrees in the upper plane with respect to the lower one, thus giving rise to a menacing volume with distorted sides and a restrained movement. This characteristic reduces the impact of its singular presence, allowing it to blend into its surroundings more easily.

🔄 Update 30.07.2018

Origin

The *Bilbao* series design is made up of a bench and a flower box, and it is inspired by the undulated titanium panels used on the façade of the Guggenheim Museum of Bilbao.

Design

The onlooker plays a part in the visual relationship established with the flower box, in which the image differs, depending on the position from which it is observed. The alignment of these boxes, arranged in different positions and rotated, creates a sequence of elements that are apparently dissimilar.

Material

Moulded concrete, reinforced with stainless steel, with a stripped finish and in the Escofet standard chart colour. Internal breathable, flexible, waterproof lining.

Installation

Self-standing on three triangular supports with a height of 3 cm. Its installation requires no anchoring elements. Drainage is carried out through a rectangular opening of 7 x 7 cm.

The Bilbao bench and the Bilbao planter are dry-cast concrete elements that aim to give the rigidity of the material a soft, organic appearance, through a continuous composition of curved and undulated planes.

1. Planter

Bilbao	Bilbao 467	Bilbao 120
Dimensions	133 x 133 x 88 cm	90 x 93 x 63 cm
Weight	780 kg	525 kg
Capacity	467 L	120 L

1.1 General features

Material	Reinforced concrete	Fixing	Free-standing
Finish	Etched and waterproofed.		
Waterproofing	Inner breathable and flexible coating		

Colours

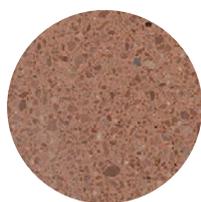

GR. Grey

BL. White

CA. CA Grey
