

Urbana is a large-format litter bin developed with UHPC-Slimconcrete technology and appropriate for areas with heavy traffic and intensive use, due to its easy of operation and 85-litre capacity. The litter bin is characterised by its rounded geometry, alleviated by grooves, which give it an austere, elegant and atemporal appearance.

UHPC | 46 cm | 215 kg | 85 L

Update 02.10.2018

Origin

Originally designed to replace the existing concrete litter bins in the city of Warsaw. Its single-piece design and high resistance as compared to the habitual sheet metal bins, is similar to the concept of an urban rock.

Functional

It has a hinged lid with an opening limited to a rectangle of 20 cm to prevent the entry of objects with incompatible dimensions. Optional closing device. The plastic bag is secured by an articulated stainless steel ring that is easy to operate.

Material

UHPC_Slimconcrete single-material body. Stainless steel bag securing ring and articulated stainless steel lid with a sandblasted finish and optional closing device.

Installation

Concealed installation by means of four threaded bolts with a rustproof protective finish in holes previously drilled in the paving and filled with epoxy resin or rich mortar.
