

*Junio* is a bench made from a single piece of concrete, with a design that reveals a geometry capable of generating presence and comfort in any urban setting. The slotted seat permits the evacuation of rainwater and increases the ventilation effect, lowering the temperature in warm weather conditions.

Concrete |  230 cm |  720 kg |  4

 Update 03.01.2018

JUNIO

Cruz y Ortiz 1999

Escofet®

#### Origen

The architects Cruz and Ortiz created their first design with Abril and Mayo and these were then followed by Junio.

#### Modular

Junio can be aligned by aggregation to form long rows of benches and no anchors are needed to install them.

#### Material

Bench made from reinforced, acid-etched, water-repellent concrete in the Escofet standard chart colour.

#### Installation

Self-standing, with no need for anchors.
