

*Abril* is a reinforced concrete, self-standing element that requires no anchors. The beauty of this bench lies in the mirage of its apparent simplicity, formalised as an arch and with a minimum slab edge in contrast with the large dimension of its supporting pilasters, thus emphasising the wide opening between its supports.

Concrete |  296 cm |  1100 kg/max |  10

 Update 07.01.2019

ABRIL

Cruz y Ortiz 1990

Iscofet®

**Origin**

The architects Cruz and Ortiz created their first design for Escofet, which they called *Abril*, and was then completed with Mayo and Junio. This is how *Abril* opened up the path for a new generation of neutral, abstract elements for universal use that eventually took on the condition of a basic vocabulary in building a language hitherto unknown.

**Design**

A design that is rigorous and simple in terms of its formulation, but universal in terms of its application. An element that is self-explanatory, that focuses, marks, locates and organises space. Well related to the terrain and the horizontal plane.

**Material**

Bench made from reinforced, etched, water-repellent concrete in the *Escofet* standard colour chart.

**Installation**

Self-standing, with no need for anchors.

1. Backless bench

Abril

Dimensions 45 x 296 x 75 cm

Weight 1100 kg

1.1 General features

Material Concrete Recycled concrete Fixing Free-standing

Finish Etched and waterproofed

Colours

GR. Grey

NG. Black

BL. White

CA. Grey CA

RA. Red

BG. Beige

EGR. Eco-Grey®

ENG. Eco-Black®

## 1.2 Installation system

### Hoisting

(P=1100 kg)

### Installation

*Unloading by fork-lift:*

Lift bench by interposing wooden boards that support bench by means of two rests placed at 2 m distance from each other.

*Unloading by crane:*

Place slings so as distance between suspension points be at least of 2 m.

## 1.3 Geometry

### Abril

## Warranty

5 years in concrete elements.
