

The *Prat* table and stool are modular elements designed to function as individual elements and also in different combinations, with unlimited options in terms of aggregation and versatility. *Prat Mini* complements the original design with the table and stool models for children whose installation can also be isolated or attached to the adult model. The polished concrete finish of the upper plane of the two tables is the ideal material option for intensive use, in view of its resistance and ease of maintenance in outdoor areas.

Concrete |  80 cm/max |  209 kg

Add-ons: **Chess Table**

 Update 19.11.2020

Origen

Originally designed for the urban gardens of El Prat de Llobregat, they were installed in groups of four tables flanked by eight stools.

Design

Both models (the *Prat* table and stool) are the result of playing with the matter and ensuing voids of an original cube measuring 80 x 80 x 80 cm in which the vertical and horizontal planes have the same thickness. The *Prat Mini* collection is the result of applying homothetic of the original adults model to adapt it for kids.

Design

Its magnificent integration into any landscape or public area gives rise to an invitation to enjoy activities associated with indoor areas

outdoors, such as reading, playing board games, eating or simply conversing or resting.

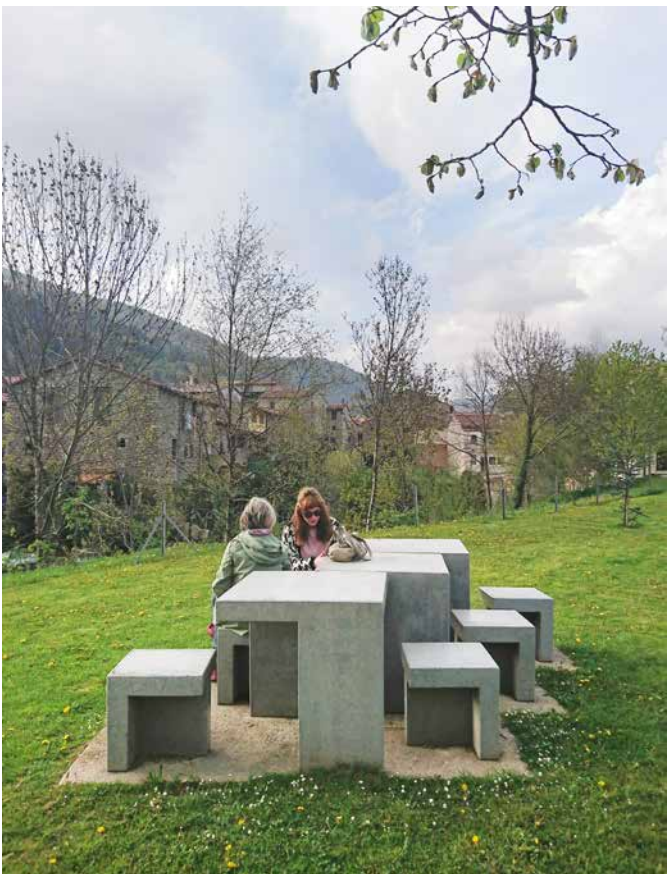

Material

The table and stool assembly are made from moulded concrete, with a etched finish in the *Escofet* standard chart colours. The upper surface of all models with a polished finish.

Installation

The *Prat* table is anchored with two M16 x 140 mm threaded rods and the stool is anchored with three M16 x 140 mm to the paving or continuous foundation slab. Children version with only two threaded anchor rods.

1. Table and stool
