Escofet®

Robust

The UHPC-Slimconcrete technology allows for the design of extremely durable, lightweight elements with a minimum structural cross-section, due to their high resistance to compression, bending, impact and wear. The extremely low water absorption properties of this material improve its behaviour in the face of fragmentation due to freeze cycles in places with harsh climates.

Adaptable

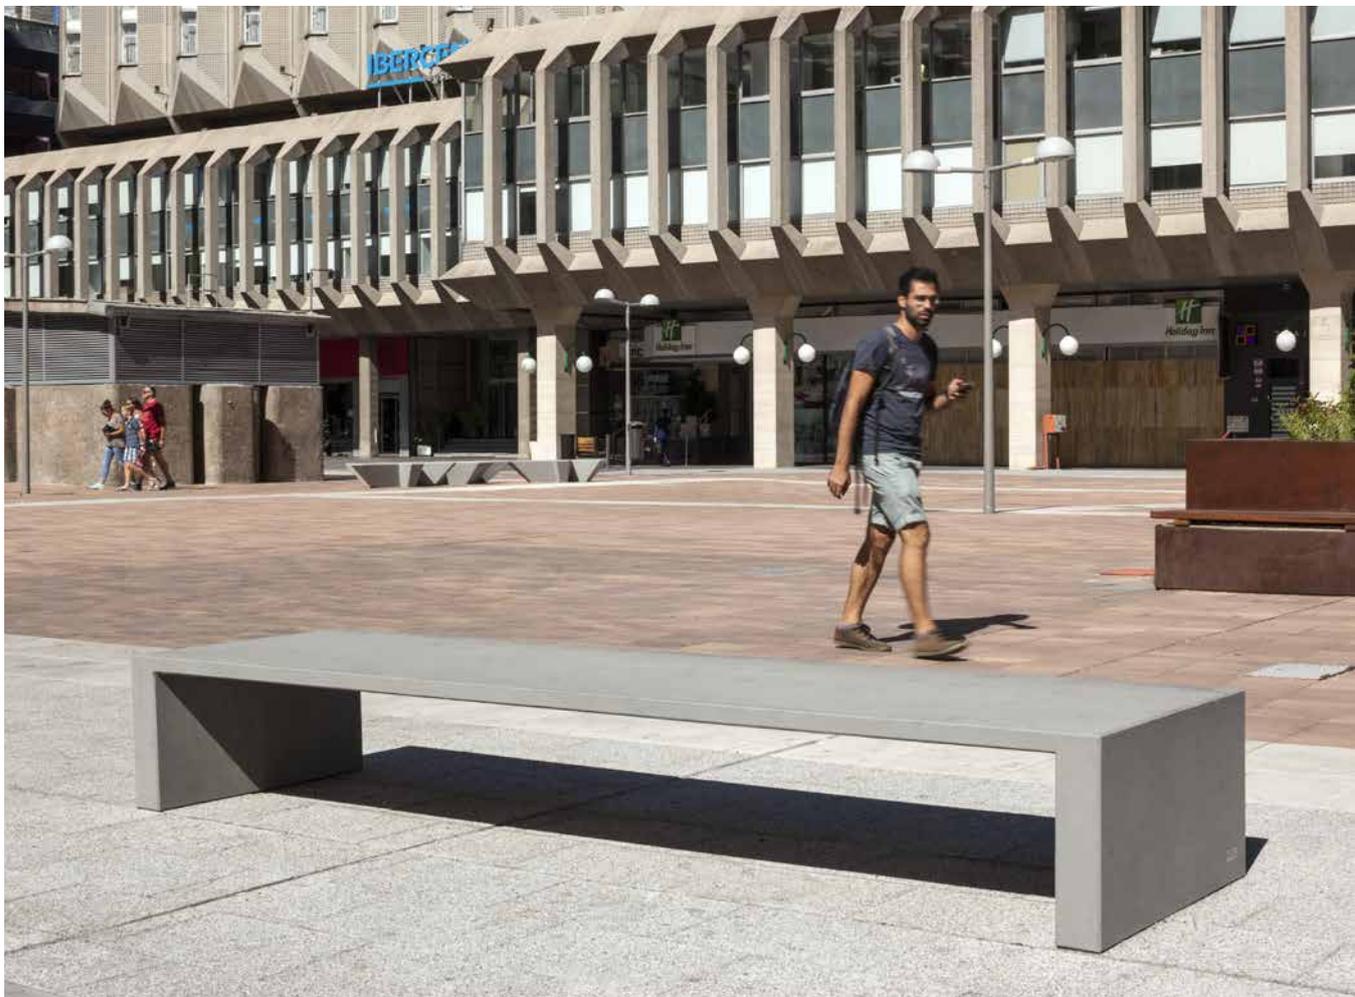

The *Prima* collection has two bench formats, completed with a table. Its neutral, abstract design means it can easily be installed individually in any environment, in an aligned formation or in flexible arrangements consisting of tables, backless benches and seats.

Material

The lightweight nature of the UHPC-Slimconcrete products makes them easy to transport and reduces energy consumption in their fabrication. Their 100% recyclable material composition optimises their life cycle.

Installation

The four models can easily be lifted and handled with slings and can be installed with supports or optionally anchored to the paving. No specific foundation elements are required.

PRIMA

Escofet®

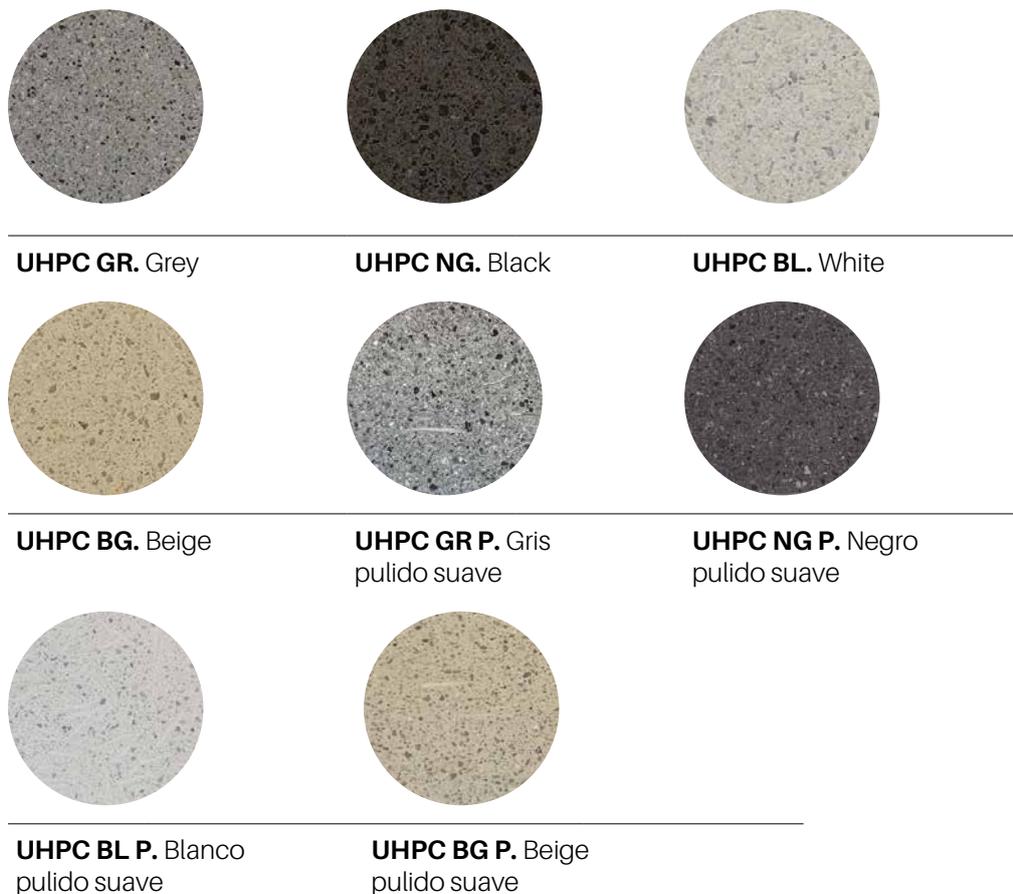

1. Table, backless bench and stool

Prima	Backless bench 220	Backless bench 300	Stool	Table
Dimensions	220 x 45 x 60 cm	300 x 45 x 82 cm	60 x 45 x 60 cm	220 x 75 x 90 cm
Weight	275 kg	596 kg	132 kg	508 kg

1.1 General features

Material	UHPC Concrete	Fixing	Anchored with screws
Finish	Etched and waterproofed / Soft polished (*)		

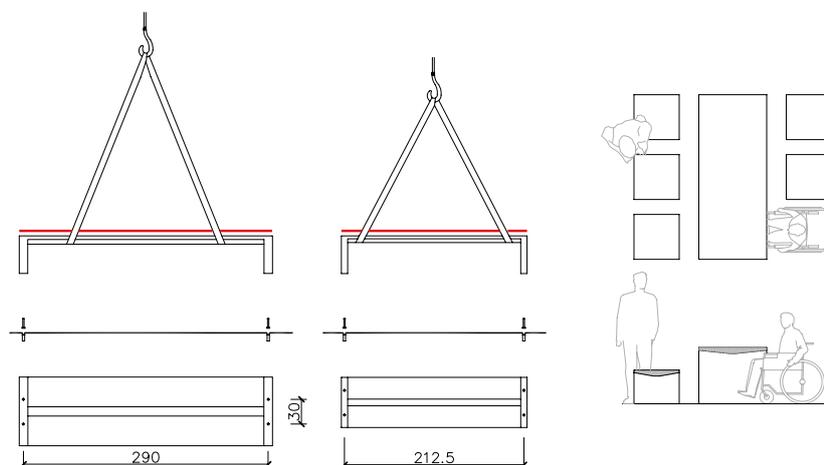

Colors

1.2 Installation system

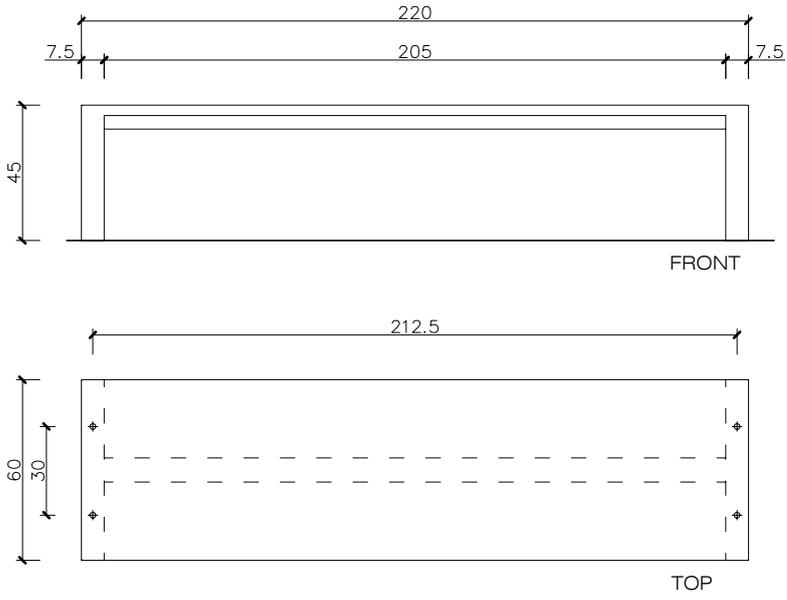

Hoisting
(P= 132 kg / 275 kg / 537 kg / 596 kg)

Installation
Tightly screw the 4 bolts M-12x140, then, drill pavement (Ø40x180) and fill with resin and finally, center and place.

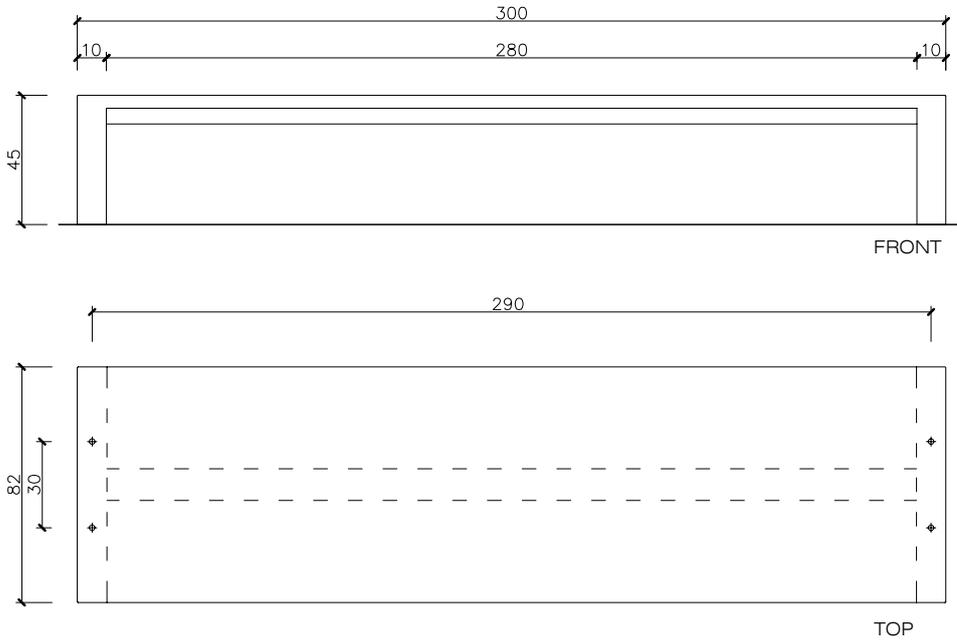

(*) The soft polished finish is only applied on the upper surface (see red line).
