Starfish is a revamp of the Flor backless bench, in a new material. Unlike its concrete predecessor, which includes two combinable formats, the new Air Collection version has a single model whose biomorphic, radial design allows for flexible, grouped or individual use. This version is highlighted due to its lightness, the wide color palette and the possibility of incorporating a white LED lighting kit.

Polyethylene HDPE | 🖸 185 cm | 📩 56 kg | 🖫 6

Add-ons: **LED** 

C Update 30.03.2022

## Origin

The review of the *Flor* bench concept by Emilio Tuñón in order to create *Starfish* is based on a star-shaped structure with five arms that rest on five short legs at their ends.

### Recycled and recyclable

It is monomaterial and 100% recyclable. The option in black color is 100% recycled, and consequently it is an environmentally sustainable product.

## Non-porous

The peculiarity of non-porous HDPE material means that its surface is easy to wash with pressurised water and a degreasing detergent that contains surfactants. It is disinfected with a hydro-alcoholic solution.

#### Material

Made with rotomolded HDPE polyethylene, it's available in a wide variety of colors. With a threaded inspection chamber cover permitting access to the interior.

#### Installation

Can be installed on the paving, and anchored, if required, using a hidden and removable system.

# 1. Backless bench

Starfish			
Dimensions		185 x 170 x 45 cm	
Weight		56 kg	
Lighting	5 LED profiles, 57 white colour t° 5000k Only in white		
1.1 General features			
Material	Polyethylene HDPE	Fixing	Free-standing / Anchored
Finish	Micro-textured	Performance	UV resistance and outdoors
Flame retardant	Complies with the regulations euroclasses UNE-EN 13501-1:2019, classified as "E" in relation to its reaction to fire behavior.		
Colouro			

### Colours

<sup>\*</sup> Optional colour according to project

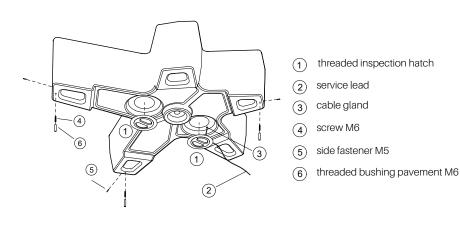

## 1.2 Installation system

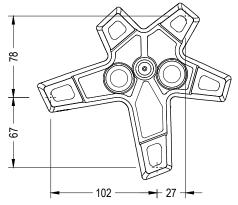

### Hoisting

(W=56 kg)

#### Installation

- 1. Indoor: free-standing
- 2. Outdoor: Hidden and Removable anchored: Screw the M6 screws into the bushing supplied. Place the bushing+screw kit in the existing holes in the bench. Screw in 3 M5 side fasteners until the M6 screw is tight. Rotate the bench, mark the position. Drill holes in pavement (Ø20), fill with resin or fat morter and place the bench. Optionally, to gain weight, the customer can ballast it with sand.

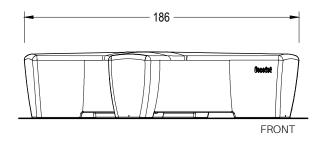

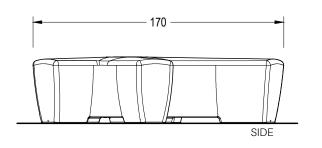

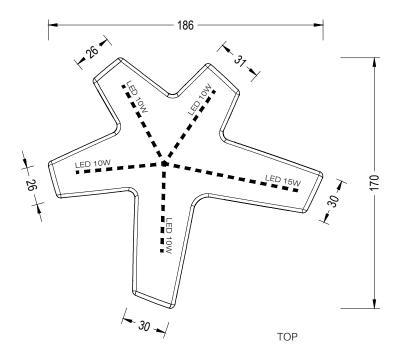

# 1.3 Geometry
