

A series formed by two combinable concrete bases: The LONGO bench, LONGO cube and two wooden seat models with metal frames, and with or without backs. The combination of all these elements permits the formation of lines of simple modular benches made from concrete combined with seats with a random orientation. The collection is completed with the LONGO litter bin and the LONGO ashtray, both of them modules with AISI 316 stainless steel accessories.

Concrete | FSC® Certified Wood |  400 cm/max |  2670 kg |  8

 Update 18.09.2026

ORIGIN

The word longo comes from the Latin word longus, which means long. The first LONGO elements were installed in Vilablareix, Girona, as part of a project by the same author.

MODULAR

The collection includes a 100 × 100 × 45 cm cube, a 400 × 100 × 45 cm bench, and a 60 × 100 × 45 cm litter bin or ashtray. It is complemented by wooden slat accessories: bench, seat, chair, individual seat, and double backrest. When combined, these elements allow the creation of simple modular concrete bench configurations, with seating components that can be freely arranged and oriented.

MATERIAL

Non-reinforced dry-mix concrete, it is manufactured in all the chart colours with an etched or polished and waterproofed finish. Stainless steel AISI 316 components for the litter bin and ashtray. Accessories made of FSC®-certified tropical wood, with a cross-section of 13,5 × 3 cm, screwed onto three zinc plated steel supports finished with a textured silver paint, designed for anchoring to the concrete bench. The cube and backless bench models are also available with a lighting kit, equipped with a driver and a concrete inspection hatch.

INSTALLATION

The concrete modules have a simple geometry and rest on the ground with no need for anchors. The wooden accessories are supplied pre-fixed to the concrete modules in the agreed position, using screws and expansion bolts.
