

Dama is a planter made from steel sheet, which gives them a sensation of robustness, and the shape, tone and colour of traditional ceramic planters, thus returning to the spirit of old gardens and florid balconies, with the objective of transgressing the rules and sowing plants throughout urban space.

Steel | 📏 111 cm | ⚖️ 110 kg | 🪴 405 L

🔄 Update 25.09.2017

Origin

All three *Damas* -small, medium and large- belong to the Magic Flute collection, created in 1995 for the purpose of remodelling the street Santa Clara in the city of Girona. The Magic Flute site furnishing collection was inspired by the characters and music of the famous opera by Mozart. The diverse urban components comprising the *Dama* planters, *Paperegena* litter bin, Sarastro fountain and G bench have formal characteristics that allow them to relate to each other in harmony, creating a visual melody in the landscape.

Evolutionary

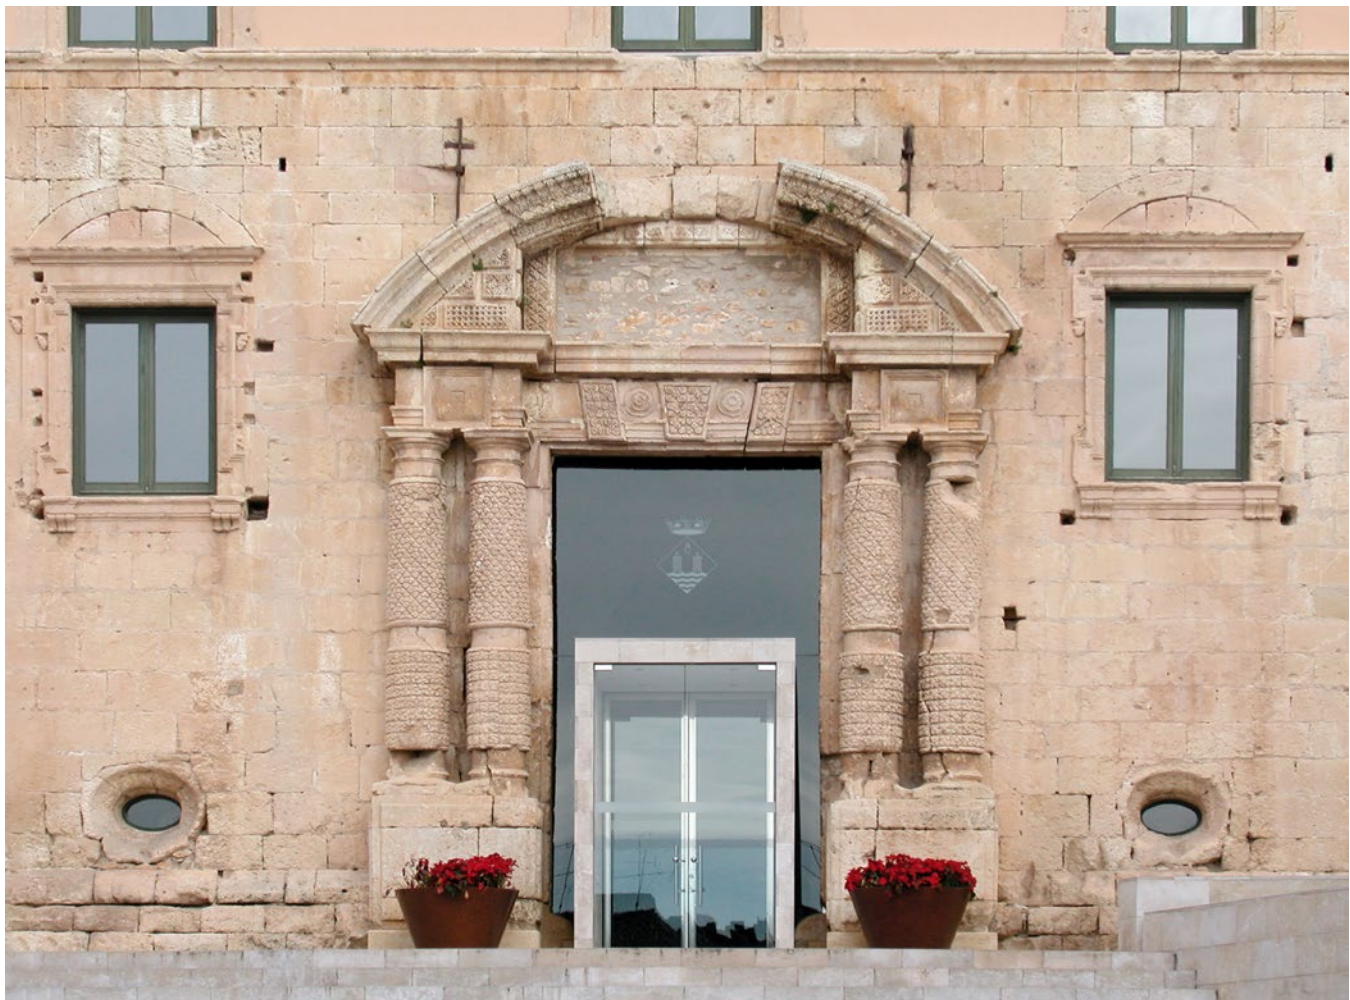

The three sizes mentioned above have evolved to a single larger-sized model with the capacity to permit the planting of larger plant species and minimal maintenance needs.

Material

It is made from a single sheet of machined, welded zinc plated steel with a thickness of 6 mm. After sandblasting and applying a baked powder coated “Corten effect” finish, the *Dama* planter surface is smooth and agreeable to the touch.

Installation

Self-standing, with need for anchors.

1. Planter

Dama	
Dimensions	Ø 111 x 72 cm
Weight	110 kg
Capacity	405 L

1.1 General features

Material	Zinc plated steel	Fixing	Free-standing
Finish	"Cor-ten effect" powdered zinc steel		

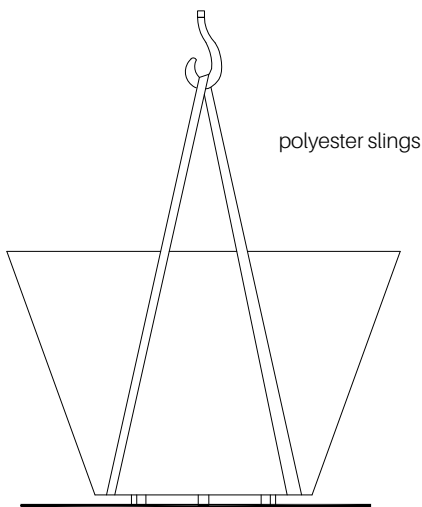

Colours

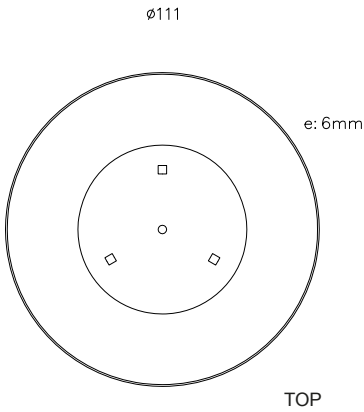

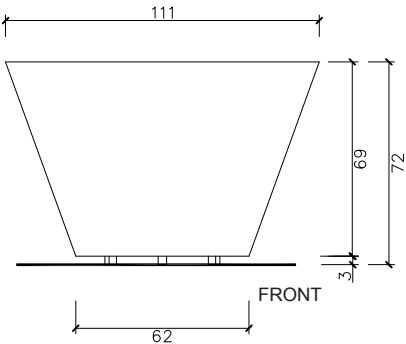

A. Cor-ten effect

1.2 Installation system

Hoisting
(W= 110 kg)
