

The MOOK bench is a unique urban furnishing element due to the precision of its dimensions and the appropriate use of the materials of the elements from which it is made. Its radically horizontal nature assumes the formal prominence of its lightweight appearance. The thin steel sections of the supports at the ends of the bench strike a contrast with the thickness and solidity of the wood, reinforcing the abstract and weightless aspect pursued by this design.

🔄 Update 21.07.2026

ORIGIN

Mook was developed within the context of the “Warsaw Designs” event, in which four architects were invited to design a bench for the city. The name Mook is the result of a play on words with the name of the Warsaw district Mokotow, where the author’s studio is located.

MODULAR

The collection consists of a chair and two bench models, 1.50 and 2.20 metres in length, all of which allow for optional armrests. In addition, there is a 1.50 metre long backless bench and stool which can be added to form a picnic table set. The shared geometry of the collection makes it easy to create groupings in long alignments that shape and limit the public space.

ERGONOMIC

The height and inclination of the back, together with the seat height, enable the Mook bench to provide a comfortable resting position. Can be supplied with the armrest accessory.

MATERIAL

A combination of sheet metal supports with a thickness of 10 mm and a single section formed by FSC®-certified tropical or pine wood beams. The supports are painted in the standard RAL colour chart.

INSTALLATION

Anchored with 12 mm diameter rods, screwed into the embedded metal supports and fastened to the ground with epoxy resin.

1. Bench

Mook	Chair	Bench 150	Bench 220
Dimensions	72 x 57 x 45 (84) cm	152 x 57 x 45 (84) cm	217 x 57 x 45 (84) cm
Weight without armrest with armrest	48 kg 54 kg	66 kg 72 kg	77 kg 83 kg
	Stool	Backless bench	Table
Dimensiones	72 x 41 x 45 cm	152 x 41x 45 cm	152 x 69 x 75 cm
Peso	35kg	55kg	90kg

1.1 General features

Seat	FSC® Certified Tropical wood / FSC® Certificated Pine Wood	Fixing	Anchored with screws
Finish	Treated with oil / High-pressure protected /		
Supports	Zinc plated steel		
Finish	Forge Black coated finish. Category of atmospheric corrosivity C5 according to UNE EN ISO 12944-2.
